Members of the Southern USA Falun Dafa Association,

The safeguarding of human rights should be a fundamental aspect in the formation of U.S. policies. The U.S. embarked on a journey towards a brighter future, spurred by the devastating events of World War II and the Holocaust over seventy years ago. In 1975, the Helsinki Accords, ratified by President Gerald Ford, set forth the "respect for human rights and fundamental freedoms, including the freedom of thought, conscience, religion, or belief."

In the current global landscape, the Chinese Communist Party is committing grave human rights abuses against the Falun Gong. It is our duty to express our disapproval of these atrocious actions. According to numerous reports, Falun Gong prisoners of conscience are being killed to support the illegal organ trade. This is absolutely unacceptable. The U.S. must stand up against such transgressions and advocate for the human rights of the Falun Gong.

I will continuously monitor this situation and keep myself updated on any legislative actions related to the rights of the Falun Gong in China. I am committed to the worldwide struggle for human rights and will denounce the political persecution of ethnic and religious minorities wherever it occurs. It is the duty of the United States to bravely resist oppression and champion the rights of those who are oppressed

Sincerely,

Brian Babin, D.D.S.
Member of Congress
